

Announcing BHC Services

Our clinic now has Primary Care Behavioral Health (PCBH) services! We offer brief visits, often on the same-day as a medical visit. The visits may help with a wide variety of problems, such as coping with a medical condition, making healthy changes, family or relationship problems, anxiety and depression, drug or alcohol problems, parenting concerns, and many others.

A Behavioral Health Consultant (BHC) provides these PCBH services.

Our BHC is: _____

To schedule a visit, please ask your primary care provider.
