

Request of the Week

Hello, teammates!

Evidence suggests that many patients diagnosed with diabetes have a difficult time accepting the diagnosis emotionally. This may lead to difficulties with beginning to make multiple changes to daily routines.

Here is my **Request of the Week:**

When you diagnosis a patient with diabetes, offer the patient a same-day BHC visit.

I will teach them several skills to help them accept the diagnosis and pursue an active, approach to self-management.

Thank you!

Your BHC
